

include a request to insert certain headings which conform to USPTO rules, practice and procedure and which are not found in the Published International Application. Further, a request is hereby made to cancel the claims numbered 1-7 on pages 7 and 8 of the International Publication and insert new claims numbered 8-15 located on pages 10-11 in the substitute specification.

Further, a request is made to accept amendment of the specification wherein the second paragraph found on page 1 of the Published International Application, namely "*The purpose of the invention is mainly to create a disposable device....*," has been removed and reinserted directly under the heading "*SUMMARY OF THE INVENTION*", found on page 3 of the substitute specification. This has been done to conform to a format more acceptable under 37 C.F.R. § 1.77(b)(6).

Still further, a request is made to accept amendment of the description of the drawing figures found on page 3 of the Published International Application to conform to the appropriate format as required under 37 C.F.R. § 1.74 and 37 C.F.R. 1.77(b)(7). The amended description of the drawing figures can be found on page 4 of the substitute specification.

A substitute specification is included since all of the amendments to this §371 U.S. National Phase application are made by way of inserting substituted pages. Accordingly, whereas the Published International Application includes pages 1-8, the substitute specification includes pages 1-12.
